

Ms. Kim

Assignment: Learning Letter

Friday, Sept 1

Due: Monday, Sept 4

Like my letter to you, your task is to write me a letter, introducing yourself to me. Please be specific with your information! This will give me information about you and help me to understand each one of you more as a both a student and individual.

Please use the following as a template, but feel free to adapt and change as necessary!

Requirements: 1.5 or Double-spaced, one-page *minimum*, two-page *maximum*

Paragraph one: Include information about yourself, such as your family, places you have lived, your pets, any travels, jobs, sports, hobbies, unique interests and/or talents, etc.).

Paragraph two: Include information about you and the subject of biology. What are your expectations for this class as far as what you learn and how you expect to do? What topics and units have you enjoyed in your previous biology courses? What are your interests outside of your biology courses? How do you learn best? What do you find difficult in terms of material and learning styles? How can I help you to succeed in this class?

Paragraph three: Include information about your goals. For example, where do you want to go after high school? What are your goals for this class, for this school year, 1 year after high school, 5 years after high school, and your life goals? What would be your dream job?

Finally, end with a *closing*. Your student, Sincerely, Yours Truly, etc. and then signed with your name.

Good luck!
